

Framework for Designing a Caribbean Information Society

INFORMATION ECONOMY

- Promote/respect IP throughout society
- Enforcement against violations
- Build IP business models appropriate for Caribbean culture – to support innovation
 - e.g. free services supported by ad revenue
 - online music services, newspapers

INFRASTRUCTURE DEVELOPMENT

- **Government to provide leadership in delivery of services in an innovative way**
 - **e-procurement, e-tendering**
- **E-leadership – political leadership transformation through training and capacity building**
