Google Books! 15 million

[Google Earth is a virtual globe, map and geographical information program.](#)

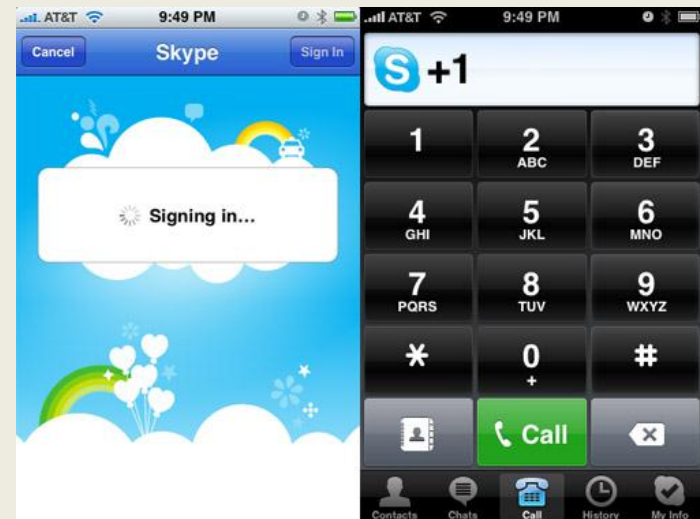

It maps the Earth by the superimposition of images obtained from satellite imagery, aerial photography and GIS 3D globe.

What's this
"Skype" thing?

Skype is a software application that allows users to make voice calls over the Internet. Calls to other users within the Skype service are free, while calls to both traditional landline telephones and mobile phones can be made for a fee using a debit-based user account system. Skype has also become popular for its additional features which include instant messaging, file transfer, and video conferencing.

Free online conversion tool

The image shows a screenshot of the Zamzar website, a free online file conversion tool. The page features a navigation menu with links for Home, Manage Files, Conversion Types, Tools, Blog, and FAQ. There is a search bar for an email address and a login field. A prominent blue banner asks, "Have you ever wanted to convert files without the need to download software?". Below this, there is an advertisement for "Want a Zamzar inbox?" with benefits like "Convert 1 GB files", "100 GB inbox", "No Ads", and "Convert Faster". The main content area is a green conversion interface with four steps: Step 1 (Select files or URL), Step 2 (Choose the format to convert to), Step 3 (Enter your email address), and Step 4 (Convert). A "Convert" button is visible at the end of the process.
